1. Executive Summary

1.1   About this document

The main objective of this document is to present and analyse the results of the Social Challenges Innovation Platform and of the three #SoChange call for solutions launched on the www.socialchallenges.eu website.
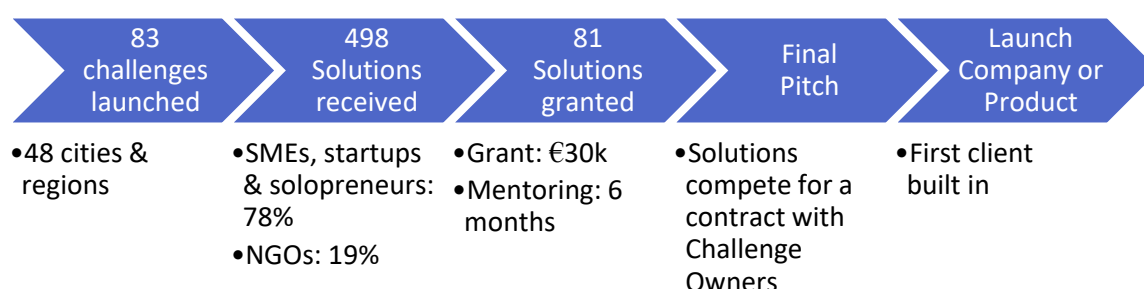

By analysing both the Challenges and the Solutions received within all three calls, and comparing them with metrics as diverse as city size and web traffic, it makes some observations regarding challenge-based innovation in Europe, particularly in support of social challenges.

1.2   SCHIP at a glance

SocialChallenges.eu made available a challenge-driven platform allowing:

- Local Authorities, NGOs and private stakeholders (labelled as "Challenge Owners") to post pressing social challenges to solve all around Europe,

- and for social entrepreneurs (labelled as "Solution Providers") to apply with their innovative solutions, competing for a 30k € grant.

The diagram sets out both the overall process and some of the early numbers achieved so far:

83 challenges launched	498 Solutions received	81 Solutions granted	Final Pitch	Launch Company or Product
•48 cities & regions	•SMEs, startups & solopreneurs: 78% •NGOs: 19%	•Grant: €30k •Mentoring: 6 months	•Solutions compete for a contract with Challenge Owners	•First client built in

In brief:

- almost 50 cities and regions in 18 countries posted 83 social challenges to SocialChallenges.eu, tackling areas as diverse as sustainable food and smart cities.
- these Challenges provoked *almost 500 Solutions*: creative ideas, pitched principally by startups, SMEs and other for-profit organisations from 36 countries
- our 3rd Call for Solutions, closed in September 2018, brought to 81 the number of creative ideas now shortlisted.
- each shortlisted Solution Provider wins a €30k grant and six months of support from local business mentors to develop a Minimum Viable Product and show that they can effectively solve the proposed challenges
- the six months implementation period is followed by a final demonstration, after which each 'Challenge Owner' chooses they want to continue working together with the selected Solution Providers.

Result: 81 promising ideas implemented, solving real-world needs

EPIM: Two more Challenges, 120 more Solutions

The challenge-based approach was so successful that the European Programme for Integration and Migration (EPIM) 'piggybacked' on the platform during the project, posting two Challenges concerning integrating migrants into European society.
The two challenges generated 121 Solutions:

- Rethinking Inclusion of Migrant Women (57 solutions)
- Rethinking Inclusion of young migrant men (64 solutions)

The 121 solutions came from 21 countries, *right*. As in the previous calls, Italy submitted the most Solutions (20) followed by Spain (17) and France (11). Winners will be chosen in late 2018.

While EPIM was not technically part of the SCHIP project, results of these Calls are included in this report to provide additional insights.
1.3 Key insights

The above figures clearly indicate that SCHIP has successfully piloted challenge-based innovation in support of social challenges across Europe.

Those figures, however, are averaged across all three Calls and all 48 participating cities/regions. The rest of this report digs into this data to find insights. The top 4 insights follow, illustrating that:

- **Smaller cities can punch above their weight**, competing with much larger cities for start-ups and innovative solutions, on platforms such as SCHIP

- **Local promotion is crucial**

- Some areas attract more interest than others – cities with Challenges in fields which are less attractive to Solution Providers need to compensate with additional promotion

- The vast majority (78,2%) of Solutions were submitted by for-profit entities (SMEs, startups and VAT professionals)

- While national borders matter, they are not obstacles:
  - while Solution Providers *prefer* local Challenges, they didn't hesitate to look abroad
 - a solid minority (35%) of Winners crossed national borders to solve a Challenge

- By the 3rd Call, around half of the Challenges and Solutions were from countries, regions and organisations unconnected to the 'local nodes' in the project, indicating that **the platform is becoming self-sustaining.**

i) Smaller cities can punch above their weight

Larger European cities are generally more successful at attracting startups from elsewhere, and keeping the startups which emerge from within them. This is a worrying trend for Europe – if taken to its logical conclusion, most of Europe's small to mid-sized cities will be 'hollowed out' of talent and growth, which will be concentrated in a handful of megacities such as London or Berlin.

However, with all cities/regions on SCHIP using the same platform, can smaller cities compete on an equal footing with their larger counterparts?

The cities and regions in SCHIP skewed towards the larger end of the spectrum, reflecting the fact that it was a pilot project that needed to minimise risks in order to experiment with adapting challenge-based innovation to social challenges.

Solutions vs Population
Despite this, some of the smaller cities in SCHIP achieved better results than their larger counterparts.

The graph on the previous page sets this out very clearly: while the larger cities, to the right of the graph, on average received more Solutions, there were many smaller cities (to the left) that did better than average. In brief:

- the "average SCHIP city" launched 1.77 Challenges and received 10 Solutions,
- Lieuwaarden (NL; population: 108k) and Angiers (FR, population: 148k), on the other hand, both launched 5 Challenges each and received 41 and 40 Solutions respectively,
- many much larger cities generated far less activity.

ii) Effort in, Results out

All cities used the same website and the same approach, so why this variation?

There does not seem to be a single explanation, although the following graph makes it clear that **local promotion is crucial to success:**
There is a good correlation between website traffic (a proxy for the city/region's promotional efforts) and the number of Challenges generated (above). The correlation is even stronger for Solutions (below).
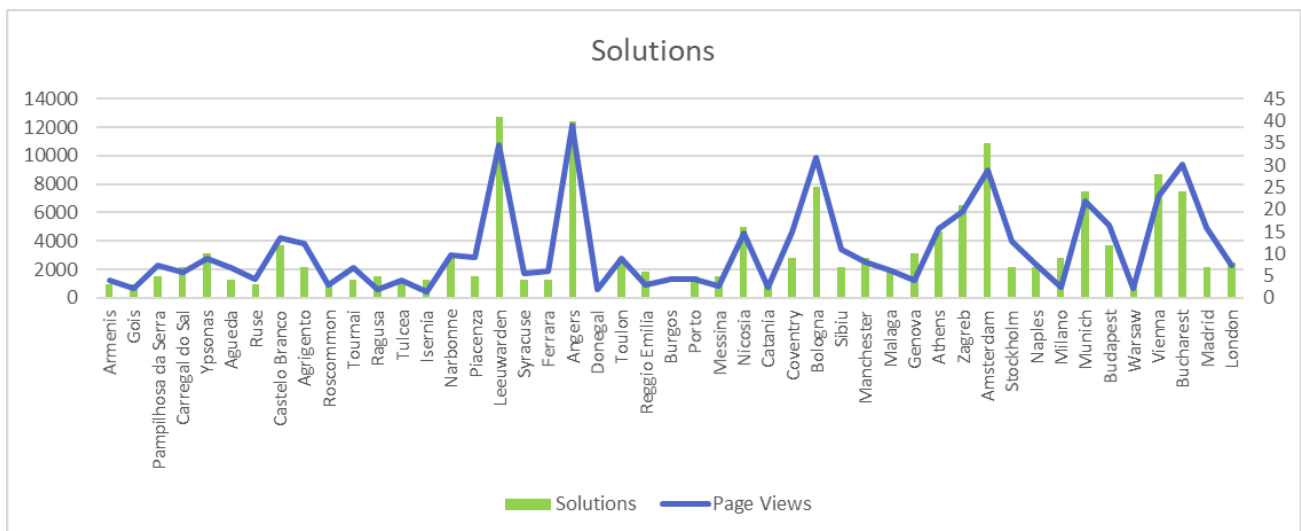

iii) Some Themes are inherently more attractive to Solution Providers

Another factor, affecting only the number of Solutions, is the nature of the Challenges.

Examining the data in terms of Challenges and Solutions across Europe reveals high variation:

- the most 'popular' Challenge received 24 Solutions,

- the next seven Challenges received 90 Solutions between them

- at the other end of the scale, 15 Challenges received under 3 Solutions each.

This phenomenon is common on platforms, where a small number of 'high performers' make as much impact as a 'long tail'.

While some of this variation may be due to differences in promotion, it is also possible that some Challenges may attract more Solutions simply because there are more Solution Providers in the relevant sector, and/or some Challenges are inherently more 'attractive' than others to startups and SMEs.

This can be seen in the following graph, which shows the number of Challenges per Theme (defined by the Commission before the first Call), and the number of Solutions those Challenges received.
The graph shows that some Themes may naturally attract more Solutions than others: Challenges in the Themes of *Aging*, *Youth*, *Refugees-Migration* and *Smart-cities* all received more *Solutions per Challenge* than average, even while some (e.g., Youth) only had one Challenge.

iv) Crossborder openness

Which cities and regions were most open to Challenges and Solutions from other countries?

The 'openness' of the countries, cities and regions on SocialChallenges.eu to Challenges and Solutions from outside their national borders can be measured using two metrics:

- **Solution Providers' horizons:** did Solution Providers focus their pitches on 'local Challenges' (i.e., Challenges from their 'home country'), or did they pitch solutions to Challenges across Europe, wherever relevant?

- **Solutions from across borders:** did the Challenge Owners from a city/region select proportionately more Solutions from local Providers, or from Providers from other countries?

Note that the figures below account for how many Solutions were pitched from local and non-local Solution Providers: it is impossible for Challenge Owners to select winners from outside their home country if they did not receive any Pitches.

These figures therefore need to be viewed with some caution, particularly when they concern a Challenge which did not receive many Solutions – one Solution more, or less, from another country changes the picture a great deal when there are only a handful of Solutions in total.

Nevertheless, they show that:

1) Solution Providers prefer local Challenges, but don't hesitate to look abroad

The graph, below, shows, per country:

- Green line *(left axis)*: the number of Challenges from that country

- Blue bar (*right axis*): the proportion% of Solutions pitched by Solution Providers to non-local Challenges (i.e., Challenges in other countries)
Unsurprisingly, the higher the number of Challenges in a country, the lower the number of Solutions submitted from that country to Challenges elsewhere. The reverse is also true. In short:

- if there are local opportunities, Solution Providers from most countries will prefer them

- if there are not, Solution Providers from most countries do not hesitate to look elsewhere.

Social Challenges Innovation Platform: Impact Report

2) A solid minority (35%) of Winners crossed national borders to solve a Challenge

The following graph shows, for most cities and regions on the platform*:

- the total number of Solutions received to Challenges from the country

- the proportion of 'local' Solutions (i.e., from organisations from the same country, although not necessarily the same region)

- the proportion of 'local' Winners - i.e., the fraction of local Solution Providers which won a grant.
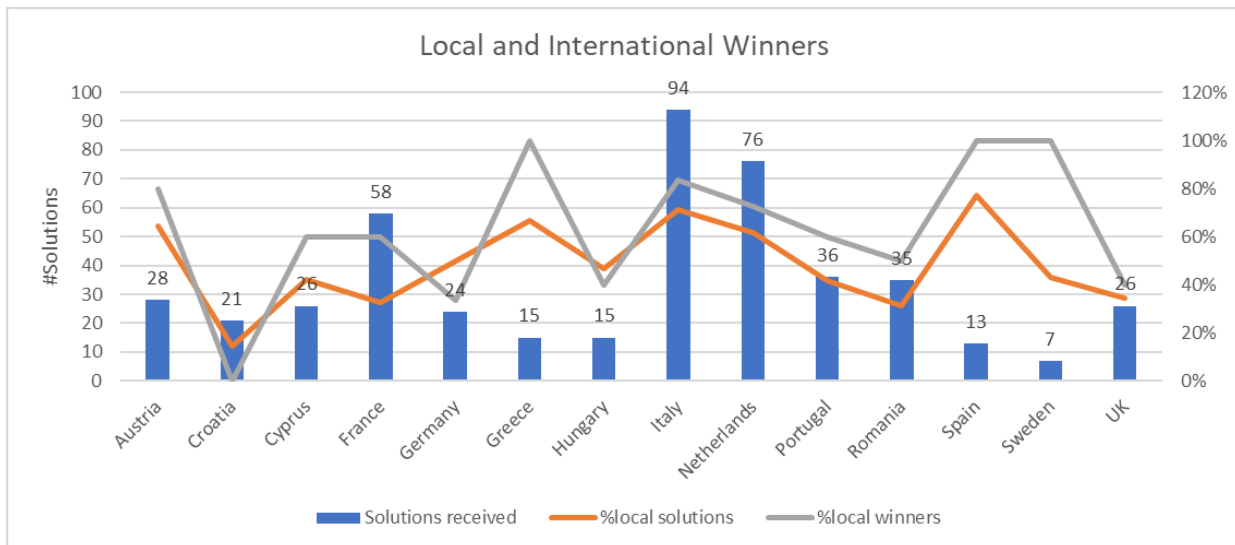

(*) The graph does not include all countries as some had either no local or no external solutions, making the comparison meaningless.

For most countries and regions, the proportion of local Winners was marginally above the proportion of local Solution Providers.

However, in most cases the difference was one *or less* additional local Winners. In Austria, for example, 2 Challenges received 28 solutions, of which 18 (64%) came from Austrian organisations. Of the 5 Winners to these Challenges, therefore, one would expect 3.2 from Austria and 1.8 from elsewhere. But one cannot choose 3.2 local Winners – it is necessarily a whole number! In the event, 4 Winners were Austrian.

Next door, Hungary swung the other way: while just under half (47%) of the Solutions were local, only two out of the five (40%) of the Winners were.

In terms of being most open to Solutions from elsewhere in Europe, however, **Croatia comes first**: all but three of the Solutions to its Challenges came from outside Croatia, as did *all* of its Winners.

In total, a third of all Winning Solutions crossed a national border to solve a Challenge in another country. This figure, moreover, completely hides the flow of innovative solutions *within* countries.

Social Challenges Innovation Platform: Impact Report

v) Towards a self-sustaining platform

Around half of the Challenges and Solutions to the 3ʳᵈ Call were 'spontaneous', indicating that the platform was by then becoming self-sustaining.

Launching any sort of online platform means tackling the 'chicken-and-egg' problem: because nobody joins an empty platform, most platforms stay empty, and die.

The SCHIP project therefore leveraged the networks of two of its partners – EBN and Impact Hub – to bring their members and local partners to the project to promote the platform and its opportunities to their local community.

Coupled with the previous point concerning the link between promotion and results, it is clear that these networks were crucial to get the message out initially: without them, it was unlikely that we would have generated so many Challenges and Solutions for the first Call, when the Platform was brand new.

The data shows that while web traffic and Challenges stayed steady in Call 2, the number of Solutions dropped. By Call 3, all three metrics had dropped further. This can be explained by the fact that the local partners had 'exhausted' their contacts.

What is not shown, however, is far more significant: **around half of the Challenges and Solutions received to the 3ʳᵈ Call were from countries, regions and organisations unconnected to our local nodes**, indicating that the platform is becoming self-sustaining.

SocialChallenges & the SME Instrument

The map, right, shows the geographical distribution of the "*3208 companies funded under the SME Instrument… SMEs from Spain and Italy account for one third of both applicants and funded companies*"[1].

Italy and Spain were also the source of many Solutions and Winners on the Social Challenges platform, as can be seen from the maps below. However, these maps also show important differences, with relatively more Solutions and Winners from other countries in Southern and Eastern Europe on the Social Challenges platform:

---

CHALLENGES

2. Challenges

2.1 How many challenges were received?

Thanks to the help of local nodes (pre-identified within the EBN and Impact HUB network), we identified 30 challenges for the first call of www.socialchallenges.eu; 29 challenges for the second call and 24 for the last call. Thus, resulting in a total of 83 challenges. While in the first call all challenges came from nodes, in the second and in the third one they also came spontaneously from various applicants.

2.2 Where did the challenges come from?

Challenges have been collected from **18 countries**. The most active dynamic countries in submitting challenges were Italy (15 challenges – 18%), and France (9 challenges – 11%).

COUNTRIES	CHALLENGES	
Austria	2	2%
Belgium	4	5%
Bulgaria	2	2%
Croatia	3	4%
Cyprus	3	4%
France	9	11%
Germany	2	2%
Greece	2	2%
Hungary	3	4%
Ireland	2	2%
Italy	15	18%
Netherlands	7	8%
Poland	1	1%
Portugal	8	10%
Romania	8	10%
Spain	4	5%
Sweden	3	4%
UK	5	6%
TOTAL	83	100%

There are **48 cities** involved in the challenges received under the three #SoChange calls for solutions. The core audience (55%) are cities under 250.000 inhabitants, which are the most common type of city in Europe (83%). According to the Commission's report: "Cities in Europe - The new OECD-EC definition"[2], the average city in Europe has between 50.000 and 100.000 inhabitants (51% of European cities)

---

Size of cities where challenges are proposed
(number of inhabitatnts)

- < 100 000
- 100 000 - 250 000
- 250 000 - 500 000
- 500 000 - 1 000 000
- > 1 000 000
2.3 What were the challenges about?

Before opening the calls, two topics: "Social inclusion - Gender" and "Environment - Food", were the ones with most challenges received.

CHALLENGES PER TOPIC

- Aging: 5
- Education: 13
- Employment-Skills: 10
- Energy: 1
- Environment-Food: 17
- Health-Disability: 8
- Youth: 1
- Refugees-Migration: 6
- Smart cities-Mobility: 7
- Social Inclusion-Gender: 15
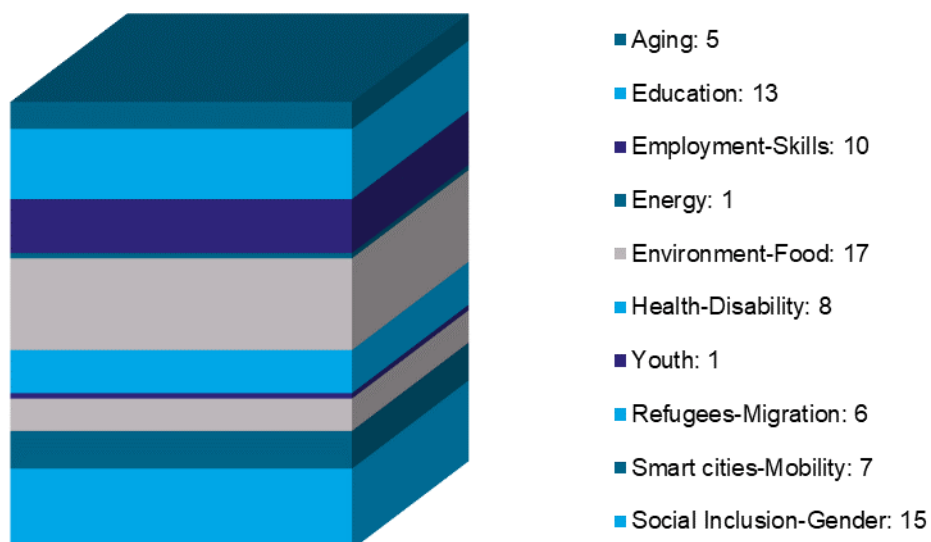

*MADRID, (Diversity in the public administration) is included in two topics: Employment-Skills and Social Inclusion – Gender.
*MADRID, (Sustainable roofs in Madrid) is included in two topics: Environment-Food and Smart cities-Mobility.

Below a distribution of the topics by city can be seen.

📍 (red)	Aging
📍 (purple)	Education
📍 (blue)	Employment-Skills
📍 (yellow)	Energy
📍 (green)	Environment-Food
📍 (white)	Health-Disability
📍 (brown)	Smartcities-Mobility
📍 (black)	Social Inclusion-Gender
📍 (grey)	Refugees-Migration
📍 (orange)	Youth
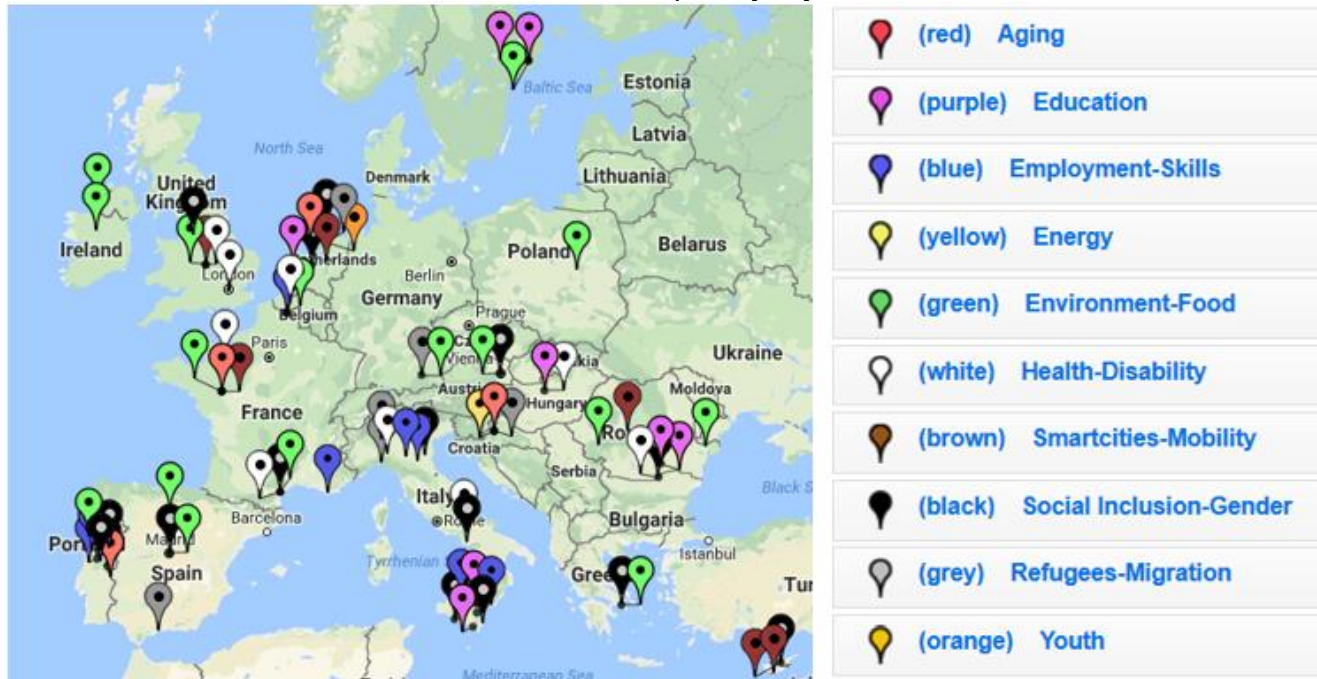

The complete list of all challenges published on SocialChallenges.eu, divided per country, city, name of challenge, challenge owner and topic, can be found in the annex.

SOLUTIONS & WINNERS

3. Solutions received

3.1 How many solutions were received?

In total numbers, 502 applications have been accounted with an average of almost 6 applications per challenge.

- The application period of the 1st call launched on www.socialchallenges.eu ended on 21st December 2017 at 23.59. In total 225 applications were received (out of which 8 resulted to be double submitted / incorrect).

- The application period of the 2nd call launched on www.socialchallenges.eu ended on 15th April 2018 at 23.59. In total 167 applications were received (out of which 5 resulted to be double submitted / incorrect).

- The application period of the 3rd call launched on www.socialchallenges.eu ended on 15th July 2018 at 23.59. In total 110 applications were received (out of which 2 resulted to be double submitted / incorrect).

As said in the executive summary, while the 1st call was exclusively managed by local nodes, in the following ones the opportunity to post challenges was given also to external users. Clearly, these external users couldn't rely on the same network of local nodes, and this has been reflected in the lower reach-out of "independent" challenges launched on-line.
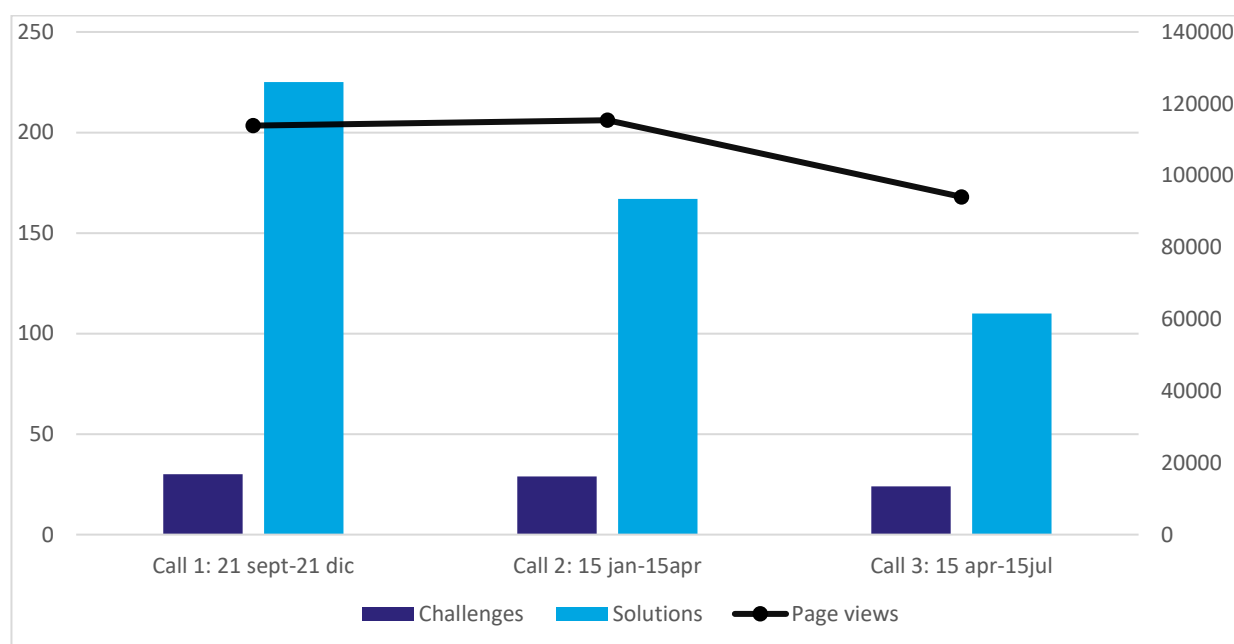

- On the 1st call, there were, on average, 7 solutions received per challenge. The most popular challenge was "Make conscious consumption mainstream in Vienna" (Austria) with 17 applications. On the other hand, the least popular was "Ashes enrich the soil" (Spain) with 0 solutions.

- On the 2nd call, there were, on average, 5 solutions received per challenge. The most popular challenge was "From job seekers to job creators!" (Italy) with 13 applications. On the other hand, the least popular were "Environmental education for disadvantageous people" (Hungary) and "The Charterhouse Heritage Park project and Digital Creative Quarter" (UK) both with 0 solutions.

Social Challenges Innovation Platform: Impact Report

- On the 3rd call, there were, on average, 4.5 solutions received per challenge. The most popular challenge was "Localise the Sustainable Development Goals (Sdgs) To Action!" (Netherlands) with 24 applications. On the other hand, the least popular were "Joint Stock Company For Good (Società Per Azioni Buone)" (Italy), "Broadband Access In Rural Gaeltacht Areas!" (Ireland), "Encourage A Sustainable Society With Daylicacy" (Sweden), "Distribute Unsold Goods To Non-Profit Organisation" (Belgium), and "Improve Efficiency Of Social Treatment Of Mental Dis-Ability" (Belgium) all of them with 0 solutions.

3.2 Where did the solutions come from?

Applications have been received from 36 countries. The top 5 countries from which applicants to the call participated have been 1) Italy, 2) Netherlands, 3) Spain, 4) UK and 5) France. Applicants from the top 5 countries together represents the 55.53 % of the total applications.

The most active countries in proposing solutions were Italy (91 solutions – 18,65%), Netherlands (58 solutions – 11,89%), and Spain (57 solutions – 11,68%).

In the following figure there is shown a distribution of the solutions received according to their nationalities:

Social Challenges Innovation Platform: Impact Report
3.3 What sort of organisations submitted them?

Solutions were received for the vast majority (78,2%) from for profit entities (SMEs, startups and VAT professionals). While 80 applications (19%) came from no-profit entities (associations, NGOs) and very few (15 applications) were received from educational institutions (universities).
	Cooperative	Foundation	Non-Profit	Registered Association	University	Profit Entities
Call 1	0	0	36	0	4	178
Call 2	2	3	36	3	6	114
Call 3	0	7	8	10	5	79

3.4 Which challenges were most popular, and why?

10% of the challenges received 21% of the solutions.

The 8 (out of 83) top challenges received together 21% of the total applications:

1) "Localise The Sustainable Development Goals (Sdgs) To Action!" in Amsterdam (24 applications)
2) "Make conscious consumption mainstream" in Vienna (17 applications)
3) "From job seekers to job creators!" in Bologna (13 applications)
4) "Social farming in the Apennines" in Bologna (12 applications)
5) "Integration and economic independence of immigrants" in Leeuwarden (12 applications)
6) "Climate protection now!" in Munich (12 applications)
7) "Connecting the elderly with care-givers to improve social inclusion" in Zagreb (12 applications)
8) "Building Social Labs for Integration!" in Munich (12 applications)

At the other end of the spectrum, as mentioned earlier, 7 challenges received no solutions at all.

vi) Topic popularity

The following graph shows the number of Challenges per Theme (defined by the Commission before the first Call), and the number of Solutions those Challenges received.
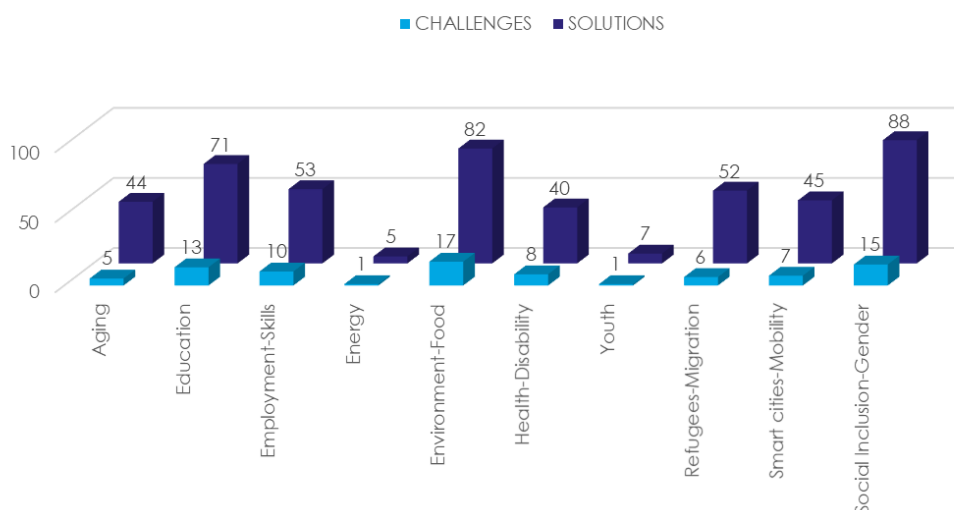

Some Themes may naturally attract more Solutions than others: Challenges in the Themes of *Aging*, *Youth*, *Refugees-Migration* and *Smart-cities* all received more *Solutions per Challenge* than average, even while some (e.g., Youth) only had one Challenge.

vii) Promotional input

Promotion has been carried out both at central and EU level by SocialChallenges.eu platform and its partners (META, EBN, IMPACT HUB), and at local level by nodes.

As set out earlier, there is a good correlation between website traffic (a proxy for the city/region's promotional efforts) and the number of Challenges generated (below), with an even stronger correlation with Solutions (next page):
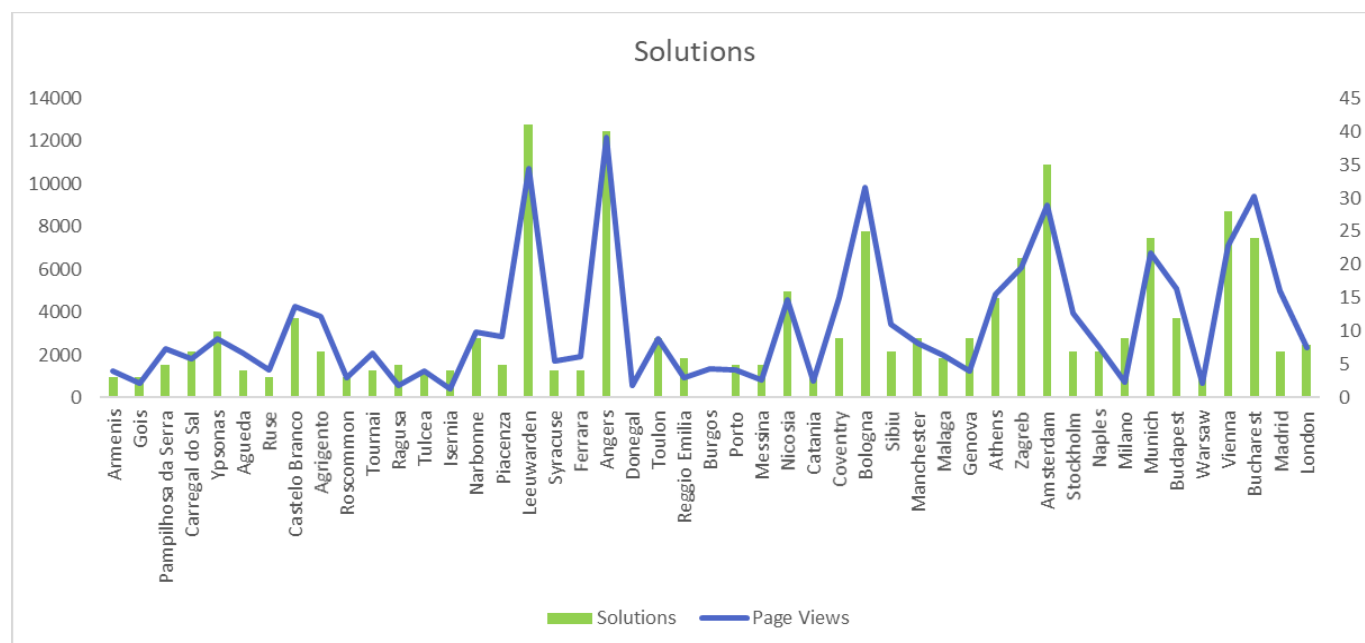

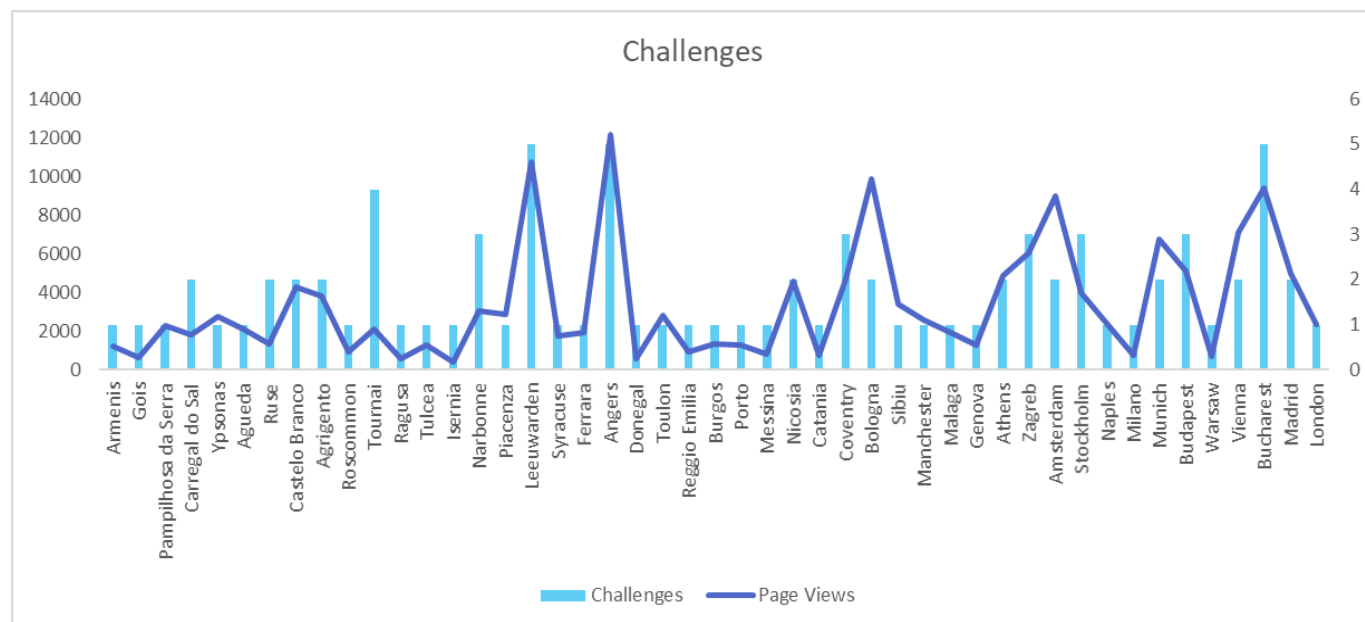

3.5 Where did the winners come from?

After a careful revision and analysis of the Solutions, 41 applications were selected and granted on the first call, 27 on the second call and 13 on the last call, to tackle the European social challenges promoted through the platform. This makes a total of 81 grants that had been distributed across Europe.

ORIGIN OF WINNERS	TIMES THEY WON	%
Austria	6	7%
Belgium	2	2%
Cyprus	3	4%
Denmark	1	1%
France	7	9%
Germany	1	1%
Greece	4	5%
Hungary	3	4%
Ireland	2	2%
Italy	20	25%
Netherlands	9	11%
Portugal	3	4%
Romania	2	2%
Slovenia	1	1%
Spain	9	11%
Sweden	2	2%
Switzerland	3	4%
UK	3	4%
TOTAL	**81**	**100%**

EPIM

4. EPIM

The European Programme for Integration and Migration (EPIM) joined the platform posting two Challenges concerning the integration of migrants into European society.

Here, it is only shown a first idea of the results since the evaluation process has not finished (results will be unveiled in November 2018).

There were two challenges:

- Rethinking Inclusion of Migrant Women (57 solutions)

- Rethinking Inclusion of young migrant men (64 solutions)

These two challenges collected 121 solutions from 21 countries. As in the previous calls, Italy was the country which submitted the most solutions (20) followed by Spain (17) and then France (11).

There were 21 solutions that were submitted to both challenges, since the idea of their projects was applicable to both challenges.

This first results are aligned with the ones collected in previous calls.

Social Challenges Innovation Platform: Impact Report

5. ANNEXES

The following Annexes provide tables of all applications per challenge and applicant. Nationality has also been indicated.

5.1 CHALLENGES PUBLISHED ON-LINE

CALL 1				
COUNTRY	**CITY**	**CHALLENGE**	**CHALLENGE OWNER**	**TOPIC**
ITALY	Agrigento	Make my City Better! by FARM CULTURAL PARK	FARM CULTURAL PARK	Social Inclusion-Gender
FRANCE	Angers	INNOWASTE	PAVIC	Environment-Food
		Accessibility for everyone & everywhere	PAVIC	Smartcities-Mobility

CHALLENGE	APPLICANT	SOLUTION	SUMMARY	COUNTRY
Joint Stock Company For Good (Società Per Azioni Buone)				
Localise The Sustainable Development Goals (Sdgs) To Action!	Look-E. B.V.	Crappy Club self-organizing collectives for waste	Crappy.Club is a not-for-profit diverse and unique resource cooperative. We envision a world wherein we keep any usable or for anyone value type of waste within the neighbourhood or city as much as possible for up- &	NL

			recycling purposes. From now on it be much easier and more fun to get rid of your waste. By contribute to recycling, sponsoring local good causes and local employment.	
Localise The Sustainable Development Goals (Sdgs) To Action!	Reuvekamp Solutions	The Sustainable Development Courses	Investing in education is the most cost effective way to drive economic development, improve skills and opportunities for young women and men, to unlock progress on all 17 Sustainable Development Goals and to prevent conflict and sustain peace	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	C-Change & Dutch Network Group	Businesses 4 SDGs Amsterdam	In Amsterdam there are 118.000 businesses, from which 99% are small and medium sized (SMEs). Only 20% of SMEs are familiar with the SDGs, & only 17% indicate they know how to contribute to the SDGs. Imagine a city where 100% of AMS businesses have teamed up in support of the Goals. Using a challenge-based campaign to engage SMEs & SEs to contribute to the SDGs, that is exactly what we propose!	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	University of Laif	#ISUPPORT SDG campaign	Problem: There has been a struggle in communicating sustainability and connecting with the internet generation. Purpose: The aim of this project is raising awareness around SDGs. Approach: Through the power of storytelling, which is inspiring and transcends all differences, a community will be build on social platforms. This in order to educate and engage citizens leading to continuous actions.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	Uitgespeeld	Connecting high school students and companies	Uitgespeeld opens the gates to the adult world and thereby gives young people the opportunity and freedom to make a difference. At the same time, we offer companies a chance to learn and benefit from the creative	NL

			and fresh ideas that youngsters have.	
Localise The Sustainable Development Goals (Sdgs) To Action!	www.veranderverh aal.nl	What's your ideal for Amsterdam?	Collect and distribute inspiring stories about people in Amsterdam working on the SDG"s (including people who are doing so without ever having heard of the SDG's), invite others to join in and show the diversity of the city in the process.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	Corporate Queer	Corporate Queer: challenging heteronorms	Corporate Queer is a platform for (young) LGBT+ professionals and all those with an open mind, working in international business. Our aim is to challenge the heteronormativity in the corporate world by connecting with each other across the globe to share our knowledge and experiences. We don't justify the status quo. We believe in 'Excellence through Authenticity'.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	RecyQ - Zero Waste International	Zero Waste Action for Communities in Amsterdam	The Sustainable Development Goals (SDGs) cannot be met unless zero waste action is addressed as a priority. Failing economic models treat resources as if they were infinite (SDG 12) and consumption patterns favour the disposable. How can we continue with a growing and increasingly urbanised global population without getting waste sorted? RecyQ helps communities start climate action by 0-Waste.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	PhiLance	Through Teamwork We Can!	Create or join a team of people to work on Sustainable Development Goals (SDGs) An online platform will allow individuals in communities both locally and across the world meet and exceed SDG's. Individuals will be able to post social impact projects or post their skills and services to help others with their projects. These services will be both paid and voluntary.	US

Localise The Sustainable Development Goals (Sdgs) To Action!	Heroes & Friends	For change makers and their friends	We select 17-Amsterdam based projects, one on each SDG, and make a short VR film about it that we screen in public parks and places city-wide. For every project we design a support campaign with Heroes & Friends where we assist with rallying the first 100 online ambassadors enabling every campaign to reach 40k friends with their inspiration, which is 600k+ people (most people in Amsterdam).	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	Socratisch.nl	Sustainable SouthEast	We contribute to sustainabilizing Amsterdam through capacity building of citizens of Amsterdam Zuid-Oost to contribute their own solutions to the Sustainable Development Goals, through a series of seven events and the co-creation of follow-up proposals and a business plan.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	Women Engage for a Common Future	Green New West	Discussions on SDG's are mostly involving people that are already convinced of the importance. If we really want to preserve a healthy and sustainable planet we need to broaden the alliance of active citizens. We would like to engage specific target groups (youngsters, women, migrants, entrepreneurs) aimed at developing local actions in Amsterdam Nieuw-West, but also connecting them to national and global climate processes in an innovative way.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	Global Goals Amsterdam	Global Goals Amsterdam	Global Goals Amsterdam is an alliance of four social innovators from Amsterdam; Voor je Buurt, 1%Club, Limelights and GoodUp. We aim to translate the Global Goals into local action. We propose an action based approach; we will challenge and facilitate 17 changemakers from Amsterdam to set up 17 tangible Global Goals projects, here and abroad.	NL

			With our tools and services we train and support them to reach and engage 170.000 people in Amsterdam.	
Localise The Sustainable Development Goals (Sdgs) To Action!	Makematic	SDG Action Packs	We will create and distribute 10,000 SDG "Action Packs" for teachers and parents. Each pack will include access to 3hrs+ of animated and live action video content on the SDGs; project cards incorporating "Amsterdam-specific" actions for young people; and profiles of young, local changemakers. These packs will help drive meaningful conversations in homes and classrooms across the city.	GB
Localise The Sustainable Development Goals (Sdgs) To Action!	Kringwijs-CiviX-Dropouts BV	Creating new SDG Ambassadors	This solution is about changing behavior through storytelling. We propose to produce and distribute online magazines with videos and vlogs on SDGs among all citizens of Amsterdam. Moreover we will organise SDG Conferences in which people will be invited to share their stories and personal experiences on SDGs and to work out their own action plans and goals with regards to these SDGs.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	F/ MAG	Redefining the way we wear	F/ MAG is the magazine and platform for fair / slow / forward fashion, for conscious mind and keen spirits. Browse through our digital or print editions for inspiration - or come to our forward fashion space to find or mend the fashion you want - without compromising your karma score. F/ MAG aims to transform the world of fast fashion by redefining the way we wear.	NL

set of 17 Sustainable Development Goals (SDGs) to end poverty, fight inequality and injustice, and tackle climate change by 2030. Today we are 3 years down the road, what is next? In this solution for the challenge provider Amsterdam we focus on influencing inhabitants and other actors in Amsterdam through local businesses (SMEs and corporates) by: 1. Create awareness & action around the SDGs for the businesses: help 21 businesses work concretely on their SDG roadmap with the help of the SDGs and the Design Thinking method 2. Create ambassadorship around the SDG within Amsterdam and beyond: teaching ambassadorship skills so they spread the SDGs around the city through their partners and stakeholders Local businesses could have a tremendous impact on the SDGs and the city of Amsterdam if we help them get started. Their influence and possible impact is easily overlooked even though they have the influence to engage big numbers of inhabitants and other actors of Amsterdam and change whole industries by influencing their partners and stakeholders.

Inclusiveness; how do we address this? 1. We will focus on attendants in the program from specific industries that interact with inhabitants and other actors in Amsterdam beyond culture, religion, background etc. For example, the Food industry, fashion, Energy 2. We will focus on local SMEs and corporates that interact with a great number of Amsterdam inhabitants and other actors 3. We will focus on local

			SMEs and corporates that employ Amsterdam inhabitants and other actors in Amsterdam	
Localise The Sustainable Development Goals (Sdgs) To Action!	Sailmate	Sailmate - bags with an impact	Sailmates are bags with an impact. Upcycled sails are turned into fashion bags. The raw material comes from local sailmakers around Amsterdam, production is done in Amsterdam and integrates refugees in the making process, 10% of the profit goes to sea rescue in the Mediterranean. Sailmate is the living proof that fashion can make a positive social and environmental impact along the way.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	The Innovation Station	SDG Amsterdam Battle	The SDGs are important for everyone, but mostly for the young ones. Children will benefit most from reaching these goals as they are about their future. So why not involve them in creating awareness and solutions? The SDG Amsterdam Battle will help them to understand the SDGs, share the importance of them with family, friends, businesses, and others and start making the world a better place.	NL
Localise The Sustainable Development Goals (Sdgs) To Action!	blonde gone rogue	Amsterdam Shops Sustainable	Where shall I go if I want to purchase a fashionable, reasonably priced dress made in a sustainable manner? This is the question which we at blonde gone rogue want to answer with our solution that addresses point #12 from the United Nations' Sustainable Development Goals – Responsible Consumption and Production.
